summary

Computer Science student with strong academic background and exposure to software and web application development. Familiar with MERN stack with a solid foundation in programming, database systems, and software engineering concepts.

Education

Aditya College Of Engineering And Technology Bachelor of Technology in Computer Science	08/2023 – 06/2026 Surampalem
Aditya Engineering College Diploma in Computer Engineering (Percentage: 93.4)	12/2020 – 03/2023 Surampalem
Siddartha High School SSC Board (Percentage: 97.5)	06/2019 – 04/2020 Payakaraopeta

Technical Skills

Programming: C, Java	Web Development: HTML5, CSS, JS, React.js
Backend: Node.js, Express.js	Database: MongoDB, MySQL

Projects

Adaptive Career Recommendation System

Developed an AI-powered Adaptive Learning & Career Recommendation System, a full-stack web application that helps users identify suitable career paths and learning plans based on their skills and interests. Implemented machine learning techniques using TF-IDF and cosine similarity for accurate career matching and skill gap analysis. Built backend APIs using Node.js and integrated MongoDB for user data management, ensuring smooth frontend-backend communication
Technologies used: *React.js, Node.js, MongoDB, Python, JavaScript.*

vibrant Flight

Developed Vibrant Flight, a full-stack clothing e-commerce web application that allows users to browse and purchase fashion products through a responsive and user-friendly interface. Built backend APIs using Node.js and integrated MongoDB for product data management, ensuring smooth frontend-backend communication.
Technologies used: *HTML, CSS, JavaScript, Node.js, MongoDB.*

Smart Receipt Organizer

Built a serverless receipt management application using AWS services to automate receipt upload, data extraction, storage, and email notifications for efficient expense tracking.
Technologies used: *HTML, JavaScript, AWS Lambda, API Gateway, S3, Textract, DynamoDB, SNS, IAM*

Internship

Summer Intern – APSSDC Built a serverless receipt management system using AWS Lambda, API Gateway, Amazon S3, Textract, DynamoDB, and SNS to automate receipt extraction and notifications. Developed a secure frontend using HTML and JavaScript to upload receipts via signed S3 URLs, reducing backend load. Implemented real-time email summaries through SNS to improve access to organized financial data. Applied fine-grained IAM policies to ensure secure access control and compliance.	05/2025 – 07/2025
--	-------------------

Certificates

Wipro TalentNext ProgramSystem	ITSpecialist–HTML&CSS Certification	AWS Cloud Computing Certification – APSSDC
CertifiedHackVega – Certificate Of Merit	Web Development Intern – OctaNet Services Pvt Ltd	AWS Cloud Computing – DevOps Internship (APSSDC)

Achievements

- Recognized as a **Bright Star of Tech Brilliance** at HackVega, a nationwide hackathon for engineering students, for standing out in the first round of a high-impact technical challenge (June 2025).
- Awarded "Best Performer" in Industrial Training program for outstanding contributions among 100+ participants.
